About this course

Many IT professionals struggle with the Cisco 700-765 exam because the official materials can be dense and the test focuses on real-world application. This course cuts through the noise, giving you a clear, structured path to prepare using the latest 2026 practice questions and study guides.

We will walk you through each exam objective, with video lessons, downloadable study templates, and real case studies that mirror the exam environment. You will learn how to tackle difficult questions, manage your study time, and apply your knowledge in practical scenarios.

Course curriculum

Foundations and Exam Overview

- **Understanding the 700-765 Exam Structure (12m)**
Learn the exam format, question types, and scoring system to build a solid study foundation.
- **Key Topics for the 2026 Edition (18m)**
We'll map out the core exam objectives and highlight what's new in the 2026 version.
- **Setting Up Your Study Environment (8m)**
A step-by-step guide to creating an effective study space and schedule using our downloadable planner.
- **How to Use Exam Dumps Effectively (15m)**
Discover a practical method for integrating practice questions into your study without just memorizing answers.
- **Common Pitfalls and How to Avoid Them (11m)**
Real case study analysis of why people fail and how to sidestep these mistakes from day one.
- **Building Your Personal Study Plan (22m)**
We'll show you how to create a customized study timeline based on your experience level and available time.
- **Tools and Resources for 2026 Prep (14m)**
A review of the best apps, forums, and updated materials to support your learning journey.
- **Mindset and Exam Day Strategy (9m)**
Learn techniques to manage test anxiety and approach the exam with a calm, focused mindset.

Core Concepts Deep Dive

- **Network Security Fundamentals (25m)**
A problem-solving session on core security concepts tested in the 700-765 exam.
- **Cisco Security Appliance Configuration (19m)**
Step-by-step guide to configuring key security appliances with real-world examples.
- **Advanced Firewall and VPN Strategies (32m)**
Learn how to implement and troubleshoot firewalls and VPNs using the latest 2026 best practices.
- **Understanding Threat Detection and Response (17m)**
We'll break down threat models and response protocols with downloadable cheat sheets.
- **Cisco Identity Services Engine (ISE) Essentials (28m)**
A deep dive into ISE concepts, with practical configuration walkthroughs.
- **Wireless Security and Mobility (21m)**
Real-world cases on securing wireless networks and managing mobile devices.
- **Cloud Security with Cisco Solutions (23m)**
Explore how Cisco's cloud security tools are covered in the 2026 exam objectives.
- **Security Monitoring and Analytics (16m)**
Learn to use security monitoring tools with a focus on exam-relevant features.

- **Incident Response and Forensics Basics (20m)**
Step-by-step incident response framework tailored for the 700-765 exam scope.
- **Compliance and Security Policies (13m)**
How to interpret and apply security policies in exam scenarios with practical examples.

Practical Application and Scenarios

- **Hands-On Lab: Configuring a Secure Network (35m)**
A guided lab session using virtual tools to apply security configurations from the exam.
- **Troubleshooting Common Security Issues (24m)**
Real case study analysis of network security problems and how to solve them.
- **Designing a Security Architecture (27m)**
We'll walk through designing a secure network architecture, step-by-step.
- **Implementing Zero Trust Principles (22m)**
Learn how to apply zero trust concepts using Cisco tools, with a downloadable checklist.
- **Advanced Threat Mitigation Techniques (30m)**
Problem-solving session on advanced threats and mitigation strategies tested on the exam.
- **Integrating Security Across Hybrid Environments (18m)**
A practical guide to securing on-premise and cloud environments together.
- **Automating Security Tasks with Cisco Tools (21m)**
Step-by-step guide to using automation to enhance security, with real examples.
- **Performance Tuning for Security Appliances (15m)**
Learn how to optimize security device performance for exam scenarios.
- **Reviewing and Validating Your Configurations (12m)**
A checklist-driven session to ensure your security setups are exam-ready.

Advanced Exam Strategies

- **Analyzing Complex Exam Questions (26m)**
We'll break down sample questions from the 2026 dumps and show how to approach them.
- **Time Management During the Exam (14m)**
Practical techniques to pace yourself and avoid running out of time.
- **Using Practice Tests to Gauge Readiness (20m)**
How to interpret scores from 2026 practice tests and adjust your study plan.
- **Memorization vs. Understanding for the 700-765 (17m)**
A discussion on balancing memorization with conceptual understanding for exam success.
- **Handling Scenario-Based Questions (23m)**
Step-by-step method to deconstruct and answer complex scenario questions.
- **Common Tricks and Distractors in the Exam (19m)**
Real-world cases on how exam questions are designed and how to spot traps.
- **Final Review: High-Yield Topics (25m)**
A focused session on the most critical topics for the 2026 exam, with a study guide.
- **Creating Your Exam Day Cheat Sheet (11m)**
We'll show you how to create a concise, effective cheat sheet for last-minute review.

- **Simulating Exam Conditions at Home (16m)**
A practical guide to setting up mock exams to build confidence and stamina.
- **What to Do After the Exam: Next Steps (8m)**
Learn about certification maintenance and continuing education after passing.

Implementation and Next Steps

- **Building a Long-Term Security Career Path (18m)**
How to leverage your 700-765 certification for career growth, with actionable steps.
- **Staying Updated with Cisco Security Trends (15m)**
A guide to ongoing learning resources to keep your skills current beyond the exam.
- **Networking with Other Cisco Certified Professionals (12m)**
Practical tips for building a professional network in the Cisco community.
- **Applying Exam Knowledge in Your Current Job (20m)**
Real-world cases on how to use your new skills to solve problems at work.
- **Advanced Topics for Further Study (22m)**
We'll outline key areas to explore after passing the 700-765 for deeper expertise.
- **Mentoring and Teaching Others (14m)**
How to solidify your knowledge by helping colleagues prepare for their exams.
- **Setting Up a Home Lab for Continuous Practice (25m)**
Step-by-step guide to building a lab environment for ongoing skill development.
- **Contributing to the Cisco Community (10m)**
Ways to give back by sharing your experience and helping others in forums.
- **Planning for Higher-Level Cisco Certifications (19m)**
A roadmap for advancing to more specialized Cisco security certifications.
- **Reviewing Your Journey: Lessons Learned (13m)**
A reflective session to consolidate your learning and plan your next achievements.
- **Final Q&A: Common Questions Answered (16m)**
We address the most frequently asked questions from students about the 700-765.
- **Course Wrap-Up and Action Plan (9m)**
A summary of key takeaways and a downloadable action plan for post-course success.
